About Podravka

Podravka is a multinational company whose products are present on over 60 markets worldwide.

The Podravka story began in 1934, when the Wolf brothers started a fruit processing workshop in Koprivnica, which 13 years later would take on the name Podravka. To this day, Podravka has become one of the leading companies in Southeast, Central and Eastern Europe, with two segments to its operations – Food and Pharmaceuticals.

In its 75-year history, Podravka has grown into the leading Croatian food company, and a truly multinational company, with active companies in 16 countries and production in four countries. Podravka's strong market position enables it to quickly adapt to change, while still achieving its strategic goals. The fundamental focus of its production is high quality and health compliant products based on good manufacturing practice and the principles of quality assurance and food safety, along with environmental protection.

Therefore, it is Podravka's mission to offer an innovative culinary experience and healthy solutions for its customers, with ongoing dedication to improving the daily quality of life of both its consumers and its employees, through innovativeness and internationalisation.

We do not have consumers – we have guests at the table.

In the food industry, Podravka is an innovative leader with Croatia's strongest brand and the number 1 brand in food seasonings in Europe – Vegeta, followed by the brands Dolcela, Lino, Eva, Fant, Fini-Mini, Kviki and many others. In using the advantages of both global and local, Podravka's current product portfolio consists of more than 1800 products, adapted to national cuisines and nurturing the specificities of local flavours. Vegeta, Europe's best known food seasoning, was created way back in 1959. Its rich history began in the Podravka research laboratory, under the guidance of Professor Zlata Bartl.

Since its inception, Podravka has focused on countless activities aimed at contributing to the development of the local community, investing in science and education, sustainable development, culture, art, and sport, and ways to promote corporate social responsibility. The company culture is imbued with the core values: creativity, trust, passion, innovativeness, and excellence, and the company is always ready to support those projects based on these same true values.

Podravka's culinary promoters

This team has been working in nearly the same composition since its establishment 25 years ago, making it one of the most recognisable on the market. Through their regular activities, they share and compile a great deal of expert knowledge, making them ambassadors of the cuisine of this region, thanks to their contacts with all cuisines, chefs and pastry chefs.

In addition to creating and following trends, our promoters develop new projects, take part in various events, fairs and cooking shows, and hold presentations, tastings, education and professional development for our customers.

Creating a tastier world. Always with heart.

Quality assurance to the highest standards

Food safety is a systematic and integral part of the Podravka management system. It is also a matter of corporate etiquette, and the primary aim is protecting consumer health. The Podravka business quality system is actively involved in the work of Croatian and international associations involved in a systematic approach to quality. Podravka's approach to food safety and quality is defined in the Food Safety and Quality System Policy, one of the fundamental documents in the management system. Through its activities and results in this field, Podravka has proven its capabilities to meet the demands of the global market by establishing more efficient operations.

The integrated management system is based on the standards

- **ISO 9001:2015** – Certificate for quality management system, ISO 14001 – Environment management system,
- **ISO 22000** – Food safety management system, OHSAS 18001 – Occupational health and safety management system

BBQ SAUCES

A wealth of vegetables and a harmonious flavour make Podravka condiments irresistible in all culinary situations. We select only premium ingredients for processing, so these products provide your dishes with the natural flavour and can be so much more than a condiment. They can also be used to prepare diverse, creative dishes.

Condiments

Recognisable homestyle flavour, prepared using original recipes from carefully selected ingredients to make every dish irresistible. They go perfectly with a wide range of dishes so they are often used as a base, making them so much more than just accompaniments.

Good to know:

- Only carefully selected vegetables and the most flavourful spices are used in making Podravka ketchup and ajvar
- Ajvar is a delicious and aromatic vegetable relish rich in vitamin C
- Mustard with a shiny and smooth texture and harmonious deli flavour
- Horseradish can be used as a base for preparing different hot and cold sauces
- BBQ sauces stand out for their high quality ingredients and bold barbeque flavour, and are made without preservatives or flavour enhancers

Jams, fruit spreads, marmalades and honey

Podravka's fruit products are widely considered to be the best. They stand out for their characteristic flavour, aroma and colour, and are free of artificial colouring and sweeteners. They can be consumed as a spread on bread, filling for crepes and waffles, or to prepare premium desserts and cakes.

In 1934, the Wolf brothers established a workshop for fruit processing in Koprivnica - which would later become Podravka

Good to know:

- Excellent spreadability
- Made from pureed fruit
- Retains its consistency at high temperatures
- Suitable packaging
- Jam and marmalade – traditional homestyle recipe, premium quality, high fruit content, bears the mark “Originally Croatian”
- As a filling it gives fullness of flavour to strudels and other desserts
- After baking, the surface of the filling remains shiny and smooth
- High content of whole fruits and fruit pieces

Improvers

With the development of the bakery industry, the demand for high quality baker's products also increased. This led to the start of use of emulsifiers, enzymes and other active components, which together are called improvers. Improvers minimise any deviations of raw materials and other factors in the production of bakery products.

Good to know:

- Dosage is from 0.5 to 3% of flour quantity
- Wide range of use for many bakery products
- Has a decisive effect on final product quality
- Extends product shelf life
- Facilitates technological procedure in production

Podravka culinary promoters

The team of culinary promoters has been operating in nearly the identical composition since its establishment 25 years ago. This team is one of the most recognisable and active on all markets where Podravka's products are used. The constant activities on Podravka markets contributes to and collects a great deal of professional knowledge, and in a way, these experts are gastronomic ambassadors since they create numerous contacts and connect cuisines, chefs and pastry chefs.

The results of the culinary promotion team is best seen through their work:

- Keeping up with trends and creating new ones
- Contact with customers
- Participating in and organising events
- Presentations, education and professional development

- Expert associates at the Faculty of Management in Tourism and Hospitality, and in vocational crafts schools
- Cooperation with the Croatian Culinary Alliance
- Olympic Games in Athens (2004) and Beijing (2008) – presentation of Croatia and Podravka in the Croatian houses
- Presentation of Croatia's culinary heritage in the United Nations building in 2007
- First ever presentation of Croatian cuisine in the European Parliament building in Brussels in 2013
- Presentations in Croatian embassies all over Europe
- Participation at numerous international fairs (Köln, Moscow, Taiwan, London, Paris)
- Making the world's largest cabbage roll for the Guinness Book of World Records
- Making the largest crepes and cakes
- Participation in countless cooking shows throughout the region
- Designing and creating new products with the team of Podravka technologists and nutritionists
